Comment: I think the obligation to transmit 911 calls from non-service-initialized (NSI) devices still serves an important public safety objective and the service should remain intact.

If a person happened to find themselves in the midst of a crisis when they were in between switching calling plans or perhaps their plan had expired, they would not be able to call for emergency help. From a Public Safety perspective, that emergency call "safety net" is the best part of having a cell phone and should never be removed. The purpose for the 911 line is for emergency reporting and citizen safety after all.

People should be able to call for help or report an emergency even if they don't currently have a phone plan.
